PROFESSIONAL SUMMARY

Java Backend Developer with 2+ years of experience in designing and developing scalable applications. Skilled in Agile methodologies, debugging, and problem-solving. Proficient in Core Java, Data Structures and Algorithms (DSA), Spring Boot, Microservices, REST APIs, and SQL/NoSQL databases.

TECHNICAL SKILLS

- **Languages:** Java 8, Java 11, Java 17
- **Frameworks:** Spring Boot, Spring MVC, JUnit, Bootstrap
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Version Control & Tools:** Git, GitHub, Maven, Swagger, Postman, IntelliJ
- **Cloud & DevOps:** Docker, AWS, CI/CD

PROFESSIONAL EXPERIENCE

Java Developer, 1GEN, Pune | Nov 2023 – Mar 2026

- **Designed, architected and deployed 100+ scalable REST APIs** across web, Android, and iOS platforms using Spring Boot and Java 17 and improving system response time by **40%** through comprehensive testing with Swagger and Postman.
- **Spearheaded microservices migration** from monolithic architecture to containerized microservices using Docker, resulting in **60% improved** scalability, **35%** reduced deployment time, and enhanced fault tolerance across development.
- **Developed enterprise-grade security framework** using Spring Security, JWT tokens, and RBAC-based authentication/authorization, eliminating security vulnerabilities, ensuring compliance with industry security standards.
- **Optimized microservices communication** by implementing Feign Client and circuit breaker patterns, reducing API response latency by ~30% and improving system reliability by 25%.
- **Streamlined artifact management by configuring Sonatype Nexus** as a centralized repository for microservices, reducing build times by ~25% and improving dependency consistency across environments.
- **Followed Agile development** life cycle and participated in Scrum ceremonies and **collaborated with cross-functional teams** to configure, deploy, and maintain project code across development and production environments.

PROJECTS

1. Fintech Microfinance Application

- **Developed and integrated multiple payment gateway solutions** including PayPal, Razorpay, and PhonePe APIs to process secure online transactions and **engineered data security mechanisms** with MongoDB encryption/decryption protocols.
- **Architected comprehensive microservices infrastructure** from scratch using Docker containerization and Spring Boot.
- **Established distributed tracing and observability infrastructure** using Zipkin and Jaeger with OpenTelemetry integration.
- **Implemented robust testing framework** with JUnit test, ensuring code quality and reliability, reducing production bugs.

2. AI-Powered SaaS Platform

- **Developed scalable subscription payment APIs** and resolved critical production issues, reducing payment failure rates.
- **Engineered comprehensive coupon management system** integrated within payment workflows to automate discount distribution and increase orders. Built secure PDF generation system with password protection capabilities.
- **Created comprehensive social media automation platform** with integrated APIs for Twitter, LinkedIn, and Instagram content creation, enabling users to generate more social content and saving businesses hours weekly in content management.
- **Developed and deployed complete AI-powered email campaign automation** using n8n workflow platform, increasing marketing campaign efficiency by 60%. **Built intelligent chatbot solutions** with natural language processing capabilities, handling **80%** of customer queries automatically and reducing customer service workload by **50%** while improving response time by **70%**.
- **Integrated AI-driven subscription retention model** that **predicts** customer churn with **85% accuracy** and improves subscription retention rate.

EDUCATION

Master of Computer Applications
Bharati Vidyapeeth, Pune, India

2022 - 2024
CGPA: 8.82 / 10.0

CERTIFICATES AND ACHIEVEMENTS

Java Full Stack Developer

Jan 2023 - Jun 2023

Java Full Stack course by Symbiosis Skill and Profession University supported by Capgemini.
